Leo Caillier, JD

## BACKGROUND & DEVELOPMENT

In 2011, Reactwell was founded to commercialize a hard science & engineering based chemical conversion technology. In 2012, Reactwell founder received DOE sponsorship, In 2013, Reactwell received patent issuance on novel CO<sub>2</sub> conversion technology. In 2014 Reactwell entered the fire, life and safety market to address an unmet need for advanced safety services required for an internal test site. In 2015, Reactwell entered the first responder segment of the o&g, energy, chemical, agricultural, civic and government industries through investment into relevant organization. In 2016, Reactwell entered managed services for complex environments, such as labs, shops and prototyping centers.
