

Shared Wet Laboratory for Startups

Chemistry - Biology - Storage - Casework - Equipment - Systems - Compliance

Spring 2015

Spring 2016

In 2015 Reactwell completed specification, buying, user-experience, corporate sponsorship and commissioning services for Los Angeles Cleantech Incubator (LACI). The objective was to deliver a wet laboratory for clean technology startups, researchers completing data gathering through application of research and to provide small businesses with access to wet lab equipment, systems and consumables on-demand.

Core Equipment

1. Type I / II Water Dispenser
2. Small Scale Centrifuge
3. Large Scale Centrifuge
4. Pipettes
5. Autoclave
6. Sonicator
7. Microscope

Basic Analytical Equipment

1. Conductivity Meter
2. Scale
3. Titrator
4. pH Meter
5. Solids Analysis
6. Turbidimeter
7. Radiometer

Facility Systems

1. Chemical Fume Hood(s)
2. Pressure Balancing
3. Temperature Control
4. Humidity Control
5. Type III Water
6. Compressed Air
7. Central Vacuum

Compliance & Safety

1. SafetySpot.com
 - a. safety datasheets
 - b. biologicals
 - c. digital audit logs
 - d. fire systems
 - e. wash stations
 - f. training
